

Quiz

ELSYS 2014/2015

Vasil Kostov

Georgi Yosifov

Match each pattern with its description:

Pattern

Description

Template Method

Encapsulate interchangeable behaviors and use delegation to decide which behavior to use

Strategy

Subclasses decide how to implement steps in an algorithm

Factory Method

Subclasses decide which concrete classes to create

WHO DOES WHAT?

Match each pattern with its intent:

Pattern

Intent

Decorator

Converts one interface to another

Adapter

Doesn't alter the interface, but adds responsibility

Facade

Makes an interface simpler
